

Chamber of Eco Commerce (CEC)

CEC is Changing the Landscape for Training

CEC is dedicated to educating individuals and organizations. With our vast knowledge of Eco Commerce, CEC is in the perfect position to evaluate new technology, develop new markets, enhance or enlarge existing markets, create new business models, and train individuals and organizations on how bring eco innovation to the fingertips of end-users.

We reach end-users through our fast growing network of Eco Commerce Hubs. These hubs offer expert-led training programs providing individuals with an independent view and key insight to speed-to-market solutions as well as best practices and methods. We believe that local training is a key to success in commercializing new technology.

By developing and using local training and capital markets to develop partner projects, people get access to new technology and capital system. The local people own the projects at the end of training. They deploy new solutions themselves. This approach has allowed CEC to help individuals and companies get access to eco innovation. It is especially important for the local hubs, because the partner projects that ultimately succeed are designed with local needs in mind, as well mostly maintained by local partners. In addition, in the developing world this is how projects turn from top-down charity to bottom-up sustainability.

We survey key management issues, develop training programs, tech concepts, and reinforce technical skill in a series of lectures that build an individual's understanding of how to solve problems and contribute to management challenges using eco technology.

Expert-Led Training Courses

Looking for eco technology training? Look no further! At Eco Commerce Academy we have a wide array of training courses to choose from in various delivery formats. Whether you are a seasoned professional or 'wanna-be', looking to get up to speed on Eco Commerce, and to get most of your investment, we can help you.

Find the Training You Are Looking For

We have made it easy to find and get the training you are looking for. Simply contact us to learn different options available for you.

Why Should You Choose CEC Training?

If you are looking for eco technology solutions, we have the experts, the best learning environment, expertise and experience.

Why Are Our Experts Better?

When you attend our training, you receive instruction from an expert who understands your issues and how to solve your problems through technology.

We train end-users to deploy eco technology solutions, best practices, and methods worldwide.

Chamber of Eco Commerce (CEC)

Why Are Our Training Programs Better?

We deliver collaborative training programs that have been developed in partnership with highly qualified experts.

We supply each individual, group, or organization a customized and complete training program that will meet their specific needs and requirements.

Why Are Our Materials Better?

Our authors are experts and leading voices in their own right.

Our experts have authored white papers, books, and articles that represent the authoritative references on their technologies.

When compared to other curriculum, our courses are unique, complete, objective, and insightful.

We are an independent third party that turns information into knowledge and with timely action.

Training Delivery Options

We offer education using a variety of delivery methods. No matter which option you choose, you will receive the most in-depth training available anywhere.

Content Authoring Service

We can teach you how to implement particular eco technology solution. Our experts will articulate and communicate what you need to know to make you successful. We have a proven track record of making the most challenging topics easy to understand. Our experts are working with some of the leading brands and organizations to author articles, white papers, and technical books. Often, these publications become the reference for the topic covered. If you have a need for content authoring services, please contact us at info@ChamberofEcoCommerce.com or visit Eco Commerce Academy (ECA) Learning Center: www.chamberofecocommerce.com/sustainabilitycenters/learningcenter.html
